

# TED'S TIMELINE

Thanks for downloading your own version of Ted's timeline to keep track of history as you study! We hope this resource will help you get a feel for the flow of history and make history a bit more interactive. The next five pages include some of the most important dates from *Snapshots of Ancient History*. These dates are color coded based on civilization, just like the chapters in the book. Pages 7 and 8 have some blank squares in case you want to add your own dates from things you researched yourself. You can use these date markers to make your own timeline in a notebook, or you can print pages 9 to 36 to make your own timeline on your wall. This timeline ranges from 3500 BCE to 2000 CE. Since this timeline covers so many centuries it is pretty large; about 46 1/2 feet! But lots of space lets you fit lots of events! If you don't have room for that, but would still like to put it on your wall, you can print multiple sheets per page, shrinking the size of the timeline. (This should be available in the printing options on your PDF viewer.)

We hope you enjoy!

Silbury Hill  
completed  
2300 B.C.E.

Sargon of Akkad's  
empire begins  
2300 B.C.E.

Sargon of Akkad's  
empire falls
